<sup>1</sup> Figures are maximum engine speeds only. They do not include provisions for image processing, transfer, drying or post production. Nominated speeds may not be suitable for all media types and/or applications. Alternate print modes may be employed by RIP s/w for different results.

The included Print Drying System integrates with the printer to enable production at high speed and with heavy ink loads

The Ad-ATC and ATU enable roll-to-roll production with superior linearity, parallelism, and tension for off-line processing and tiling applications

The Auto Head Cleaning & Air Filtration systems work in conjunction with the Headguard to ensure superior reliability with reduced maintenance

The printer can be managed through the Control panel or via Epson Control Dashboard s/w complete with e-mail status & error notifications
