

A3 Colour Multifunction Printer
Apeos C7072 / C6572 / C4572 / C3572 / C3072

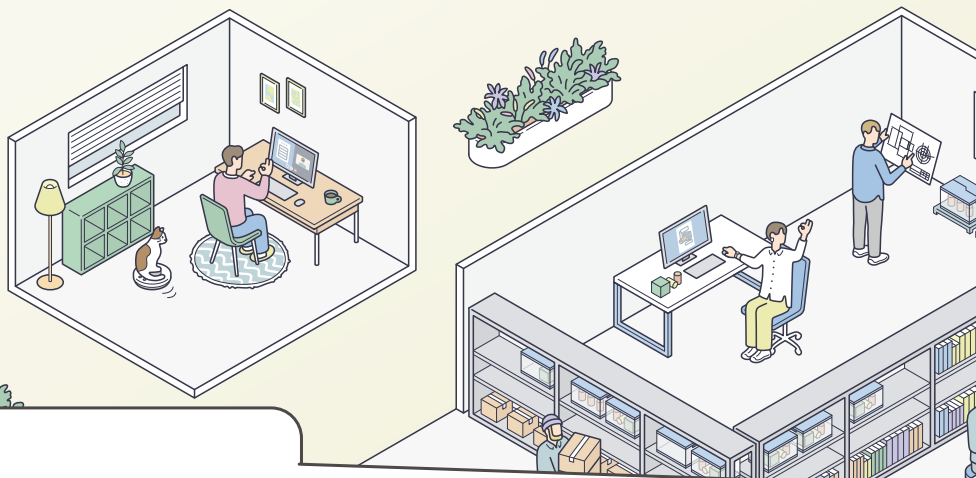

Where Business Transformation Begins

A new generation of multifunction printers,
powered by cloud and AI.

Where Business Transformation Begins

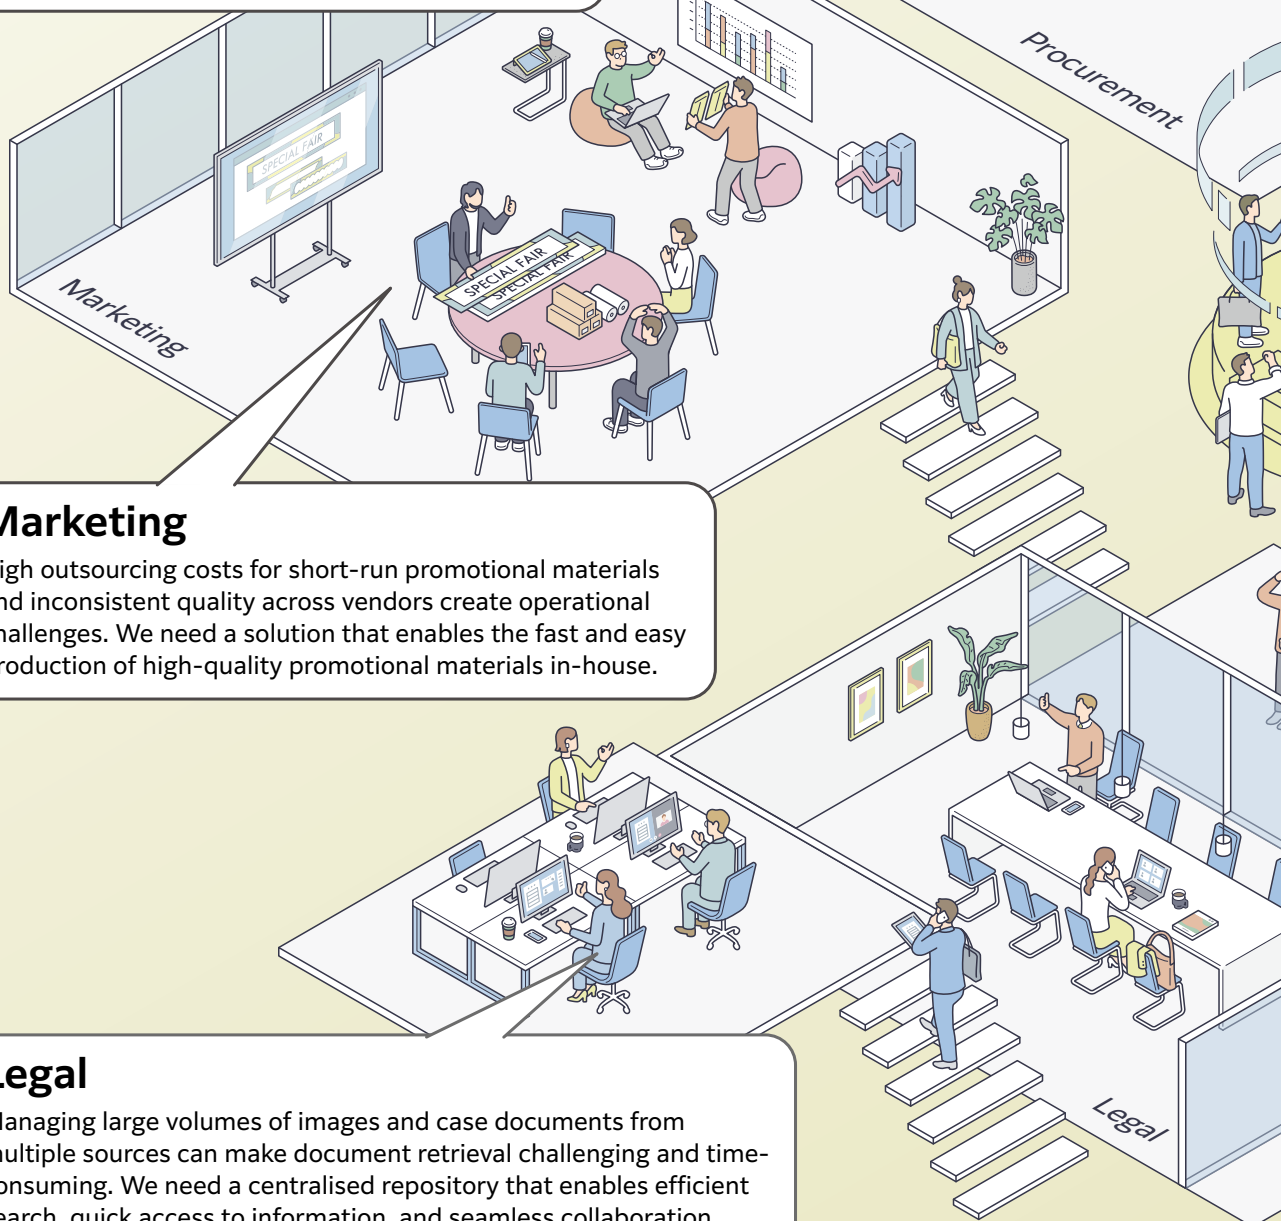

Today's organisations need more than just printing capabilities. Intelligent and connected workplaces empower collaboration, streamline workflows, strengthen security, and support sustainability.

Procurement

Organisations face growing regulatory requirements for sustainability reporting and compliance. We are seeking ways to fulfil these obligations while advancing our circular economy goals.

Marketing

High outsourcing costs for short-run promotional materials and inconsistent quality across vendors create operational challenges. We need a solution that enables the fast and easy production of high-quality promotional materials in-house.

Legal

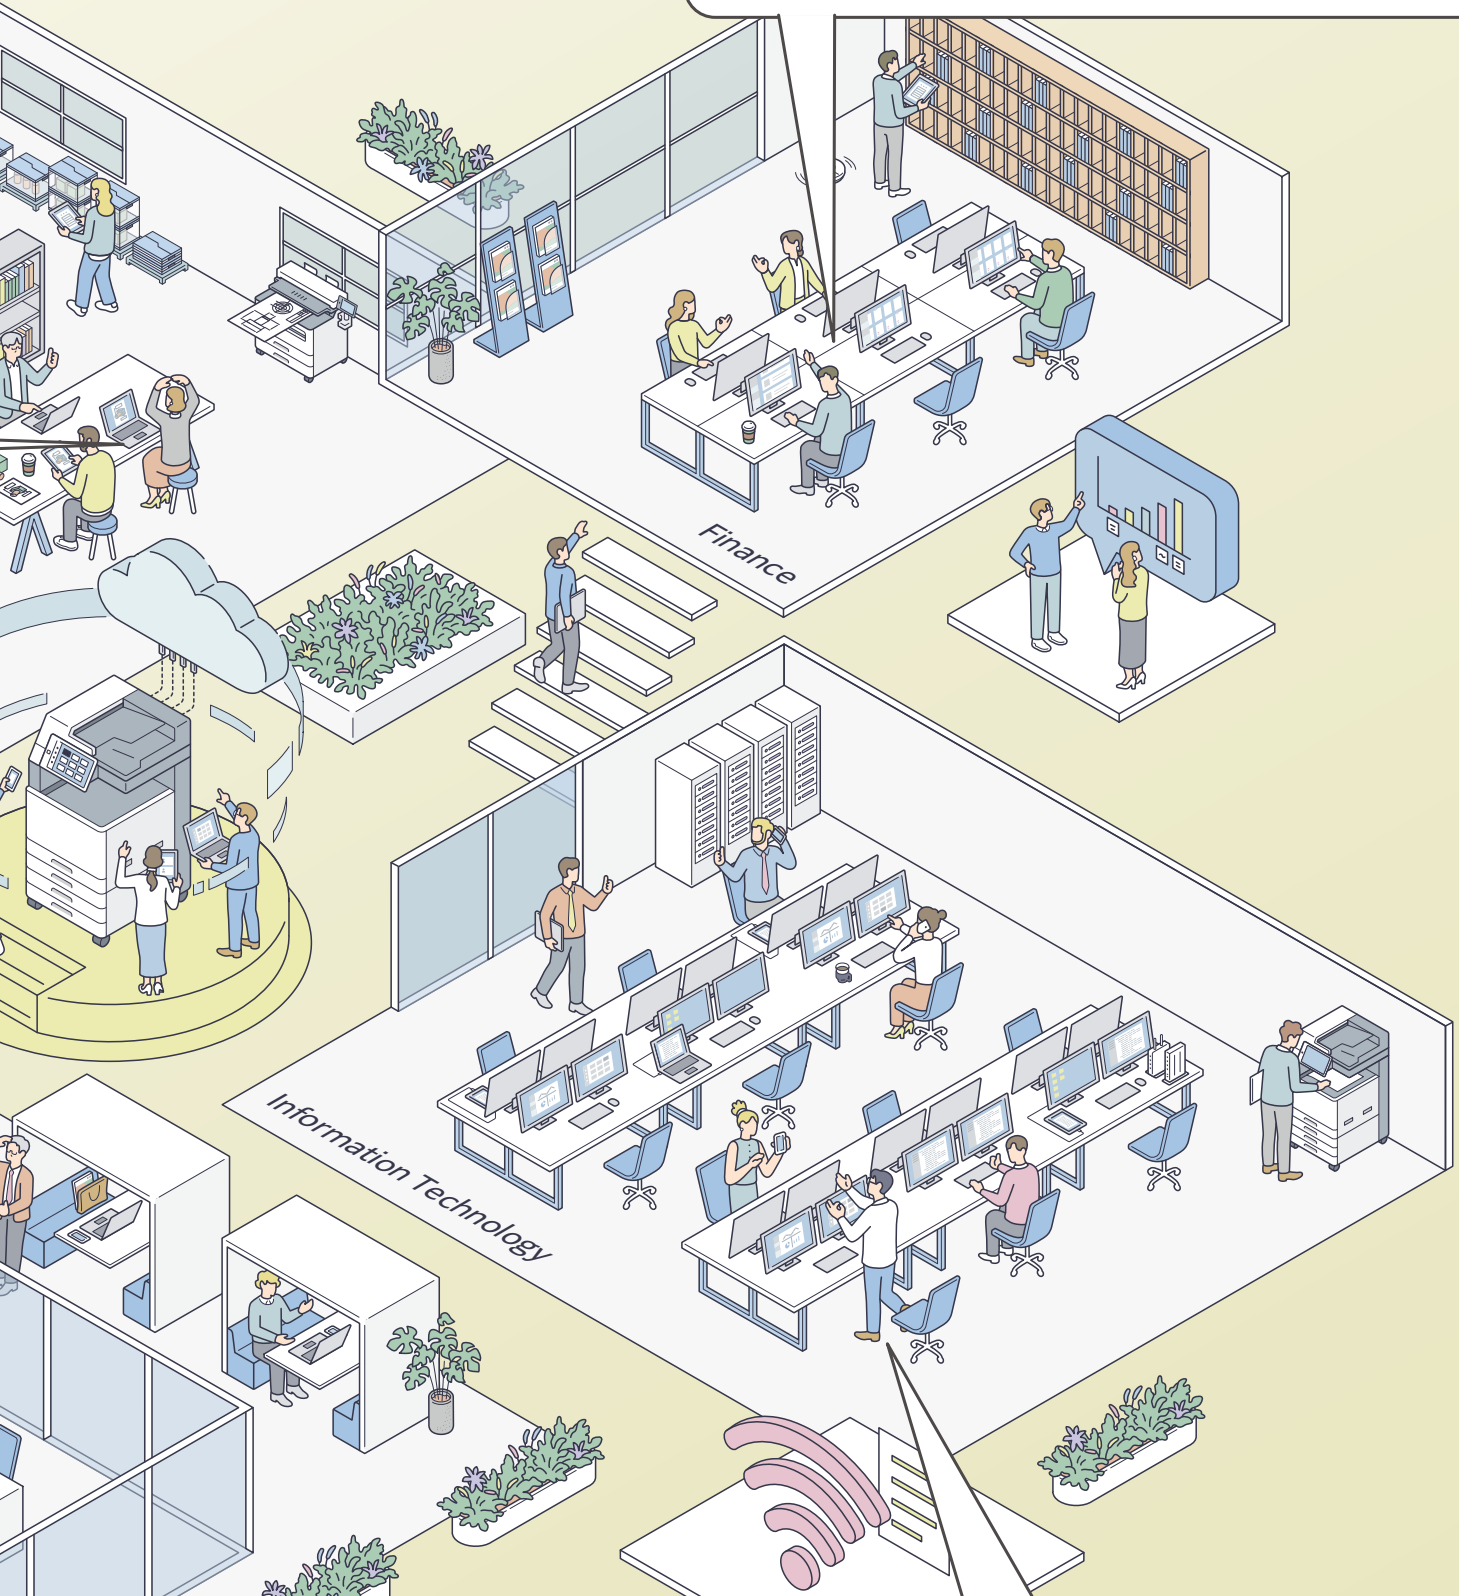

Managing large volumes of images and case documents from multiple sources can make document retrieval challenging and time-consuming. We need a centralised repository that enables efficient search, quick access to information, and seamless collaboration.

Finance

Manual processing of invoices and receipts is time-consuming and prone to human error. Businesses need an intelligent automated solution that accurately captures line-item data and accelerates downstream processing.

Information Technology

Hybrid work environments require secure, connected workflows that keep employees productive wherever they work. We need secure, integrated solutions that work seamlessly with existing systems.

A New Generation of Multifunction Printers, Powered by Cloud and AI

The new Apeos series is a gateway to digital transformation (DX). Powered by cloud and Artificial Intelligence (AI), it helps organisations digitise workflows, unlock information, and adapt to the modern workplace.

Gateway to Apeos Ecosystem

A unified platform for cloud, workflow, and management solutions, helping businesses work smarter, move faster, and transform digitally.

Accelerating DX with Cloud and AI

AI-powered intelligence boosts productivity, optimises energy consumption, and reduces downtime through proactive monitoring and remote diagnostics.

Uncompromising Security. Secured for the Cloud

Built on a multi-layered security framework, Apeos safeguards business information from device to cloud, enabling secure digital transformation.

Driving Resource Efficiency

Empowering organisations to reduce their environmental footprint through energy-efficient technologies and innovative solutions.

Gateway to Apeos Ecosystem

The Apeos Ecosystem unites cloud and connected solutions to simplify document workflows, enhance productivity, and accelerate digital transformation.

Cloud Solutions

Access to information anywhere, anytime for workflow automation and collaboration.

- **Apeos Cloud Extension**^{*1*4}
Seamlessly capture documents to the cloud and leverage AI to organise, classify and extract valuable business information automatically.
- **FUJIFILM IWpro**^{*1}
Secure all-in-one platform for digitising business workflows and documents.

Note: Cloud services provided by FUJIFILM Business Innovation.

Add-on Applications

Device-based solutions that expand device functions according to various operational needs.

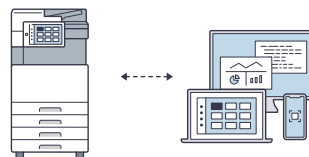

- **Serverless On-Demand Print**^{*2}
Print stored documents securely from any printer without a server infrastructure.
- **Serverless Authentication**^{*2}
Sharing of user authentication information across devices without the need for a server.
- **Scan Delivery**^{*2}
Optimise routine scanning work for efficiency and accuracy.

Management Solutions

Support various management tasks and security related to devices & printing processes.

- **ApeosWare Management Suite 2**^{*2}
A comprehensive software that manages devices and usage, and provides integrated authentication, print output, log accounting, and document distribution.
- **MPS Guardia**^{*1}
A managed print service that will shield businesses against cost overruns, data breaches and productivity loss.

Integrated Solutions

Connects devices with existing business applications and workflows, enhancing productivity and enabling end-to-end digital document processes.

- **Apeos Connect**^{*3}
A development support kit that helps solution vendors to create a linkage service and system with Apeos series devices.

*1: Separate contract is required.

*2: Optional purchase is required.

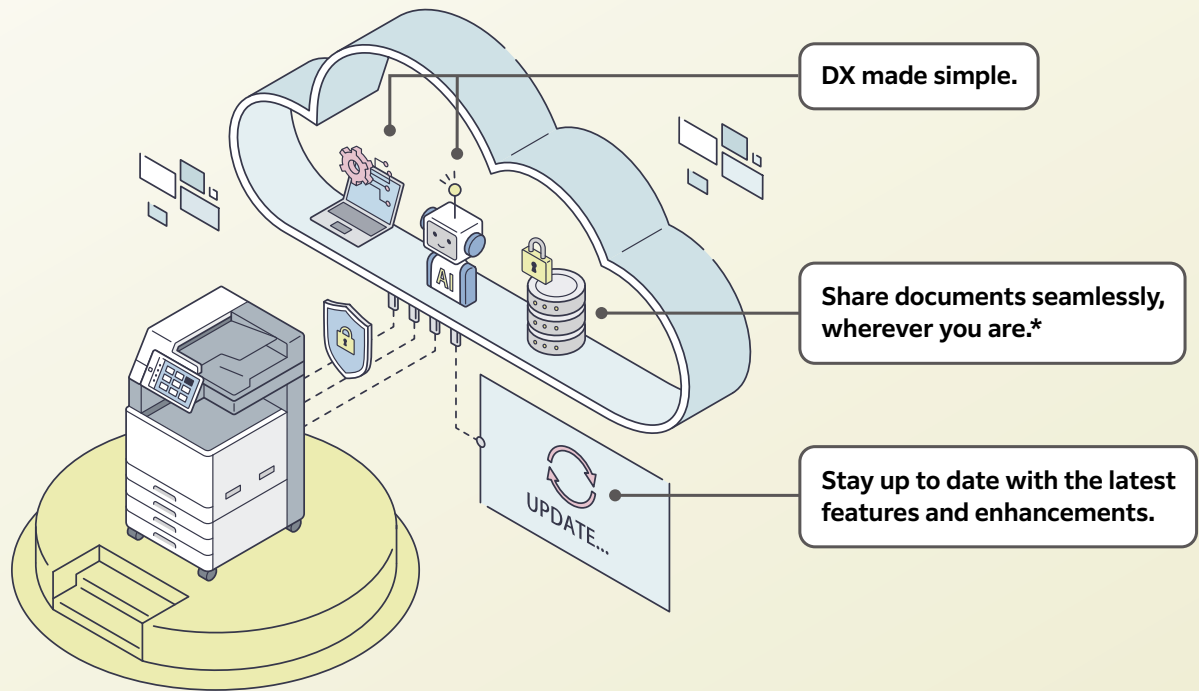

*3: Separate application is required.

*4: Apeos Cloud Extension is a post-launch item.

Accelerating DX with Cloud and AI

Cloud connectivity and AI transform how organisations manage information. Apeos Cloud Extension** enables intelligent document capture, workflow automation, and cloud integration to help organisations accelerate DX.

Apeos Cloud Extension empowers smarter workflows and productivity.

Note: Cloud features require Apeos Cloud Extension registration. Availability may vary by country or region. Customers who do not wish to use cloud features may continue to use the device's standard functions without cloud connectivity. For details, please contact one of our sales representatives.

* Additional option is required for access from outside the company network.

** Apeos Cloud Extension is a post-launch item.

Digitise. Share. Utilise. DX in one seamless workflow.

Scan to Watch

Smart Scanning Made Easy

Multi-Crop

Automatically separates and straightens multiple documents placed randomly on the scanner.

More Useful Features

Dropout Colour

Removes specified colours from scanned images.

Print-Protected Files

Prevents confidential documents from being printed by applying print restrictions to PDF files.

Book Scanning

Scans bound documents and saves each page as a separate page.

Highlight Correction Marks

Enhances correction marks and handwritten revisions for greater visibility.

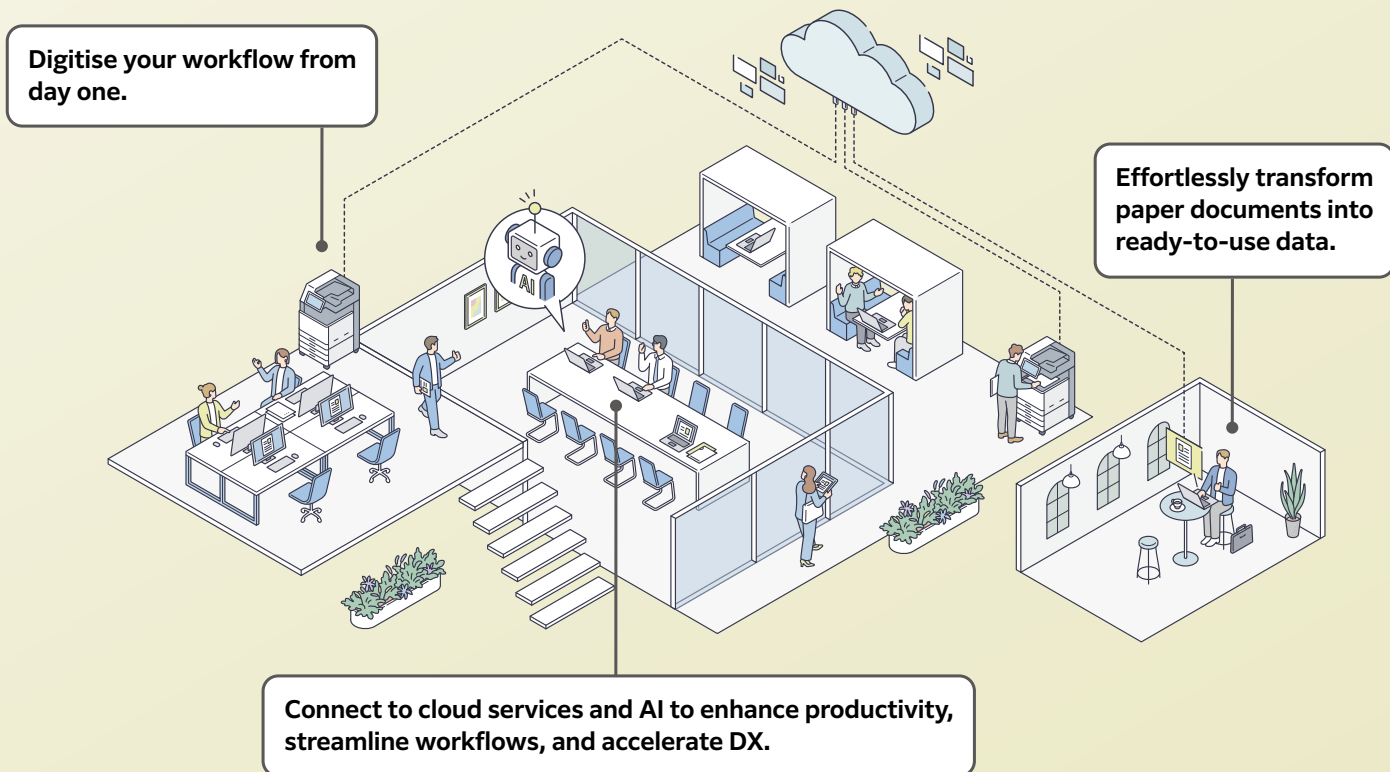

Instant, searchable file names

Automatically generates file names based on information extracted from the document, making information easier to find and use.

Unified file management

Access cloud storage through your web browser to manage all scanned files and faxes.

Cloud integration for scalable DX.

Go beyond digitisation with cloud services and AI.

Note: Optional.

Scan to Watch

Collaborate with shared cloud storage

Share a common cloud workspace across multiple devices to improve collaboration and streamline document workflows.

Direct upload to preferred third-party cloud storage*

Save scanned documents and fax data directly to your preferred third-party cloud storage service, eliminating extra steps.

* Additional cloud storage services will be supported in future updates.

Data extraction with the power of AI*

Leverage generative AI to extract business-ready data from a wide variety of documents.

* Planned for future release.

Built for Performance. Designed for Simplicity

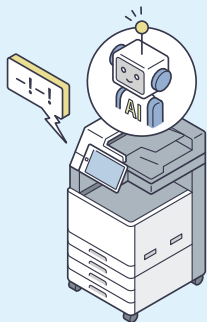

Enhance workplace productivity with intuitive features, high-speed digitisation, and proactive AI-powered support.

Remote Abnormal Noise Diagnosis Technology

AI detects the first signs of trouble.

AI automatically detects abnormal operating frequency and sends diagnostic data to a remote monitoring system. Remote diagnostics help identify root causes early, enabling faster maintenance and minimising downtime.

Note: The content of the services provided may vary depending on the usage region. For details, please contact one of our sales representatives.

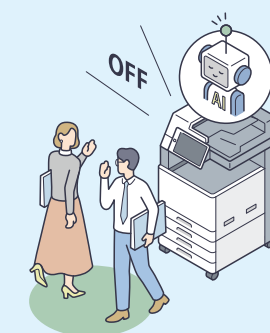

AI-Controlled Power Saver Timers

Energy efficiency, optimised by AI.

AI continuously learns how the device is used and automatically optimises the transition time to power-saving mode. By balancing energy efficiency with everyday usability, it helps reduce power consumption without compromising user convenience.

Note: The factory default setting is OFF.

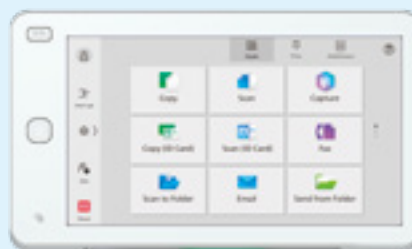

Scan to Watch

New Control Panel

Clearer. Simpler. Easier to use.

A new IPS* display panel delivers vivid colours and excellent visibility from virtually any angle. The user interface is highly customisable, from Light mode and Dark mode to home screen shortcuts for frequently used functions, making everyday operation easier and more intuitive.

* In-Plane Switching

Experience the Panel

High-Performance, Quiet Scanning

Scan high-volume documents with speed and confidence.

Despite its compact and lightweight design, the Duplex Automatic Document Feeder delivers industry-leading speed^{*1} and exceptionally quiet operation. Automatically scan 2-sided originals at speeds of up to 300 ppm^{*2}, while multi-feed detection^{*3} helps prevent missed pages. With a capacity of up to 300 sheets^{*4}, the document feeder is built to handle demanding, high-volume workflows with ease.

*1: A3 colour multifunction printers based on internal study conducted in August 2026.

*2: 1-pass 2-sided scanning using FUJIFILM standard paper (A4 LEF), 200/300/400 dpi, to Folder.

*3: The factory default setting is OFF.

*4: 70 gsm paper. A4 size.

Custom-Size Document Scanning

Digitise and share documents of virtually any size with ease.

Simply scan your business cards, receipts, and other non-standard-size documents using the Duplex Automatic Document Feeder. The device automatically crops each document to its original size and corrects skew, regardless of their size.

Note: Supports custom-size originals from 49 x 85 mm to 297 x 432 mm, with paper weights of 38 to 220 gsm for single-sided printing and 50 to 220 gsm for double-sided printing.

Scan to Watch

Versatile Media Support

Produce promotional materials in-house and on demand.

Print everything in-house, from envelopes^{*1} and postcards to long-sheet^{*2} POP displays, banners, and premium brochures. Excellent colour reproduction on coated paper gives your marketing materials a polished, professional finish.

*1: With the envelope attachment.

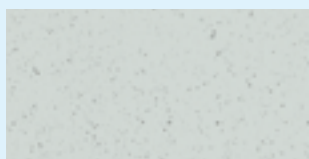

*2: Supports long paper up to 320 x 1,200 mm.

Designed to be Compact

Smaller footprint. A better fit for today's workplace.

By reducing the size of key components and optimising the paper path, every model in the new Apeos series features a compact footprint of just 598 x 685 mm. The redesigned exterior combines a refined matte, stone-inspired finish with textured side panels, creating a clean, sophisticated appearance that blends seamlessly into any office environment.

Refined matte, stone-inspired finish

Textured side panel

Smart WelcomEyes

Less waiting. More productivity.

With Smart WelcomEyes, which detects approaching users with a sensor, the device can wake from sleep mode more quickly. Visual and audible alerts help prevent documents from being left behind, while functions such as automatically resetting the device when a user walks away* enhance both convenience and security.

* The Auto Reset function is disabled by default.

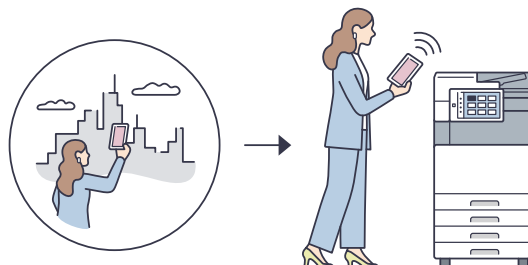

Print Utility*

Mobile printing made simple.

Print documents, photos, and other files directly from your mobile device. With one-time setup, simply tap your device on the multifunction printer for fast, convenient printing.

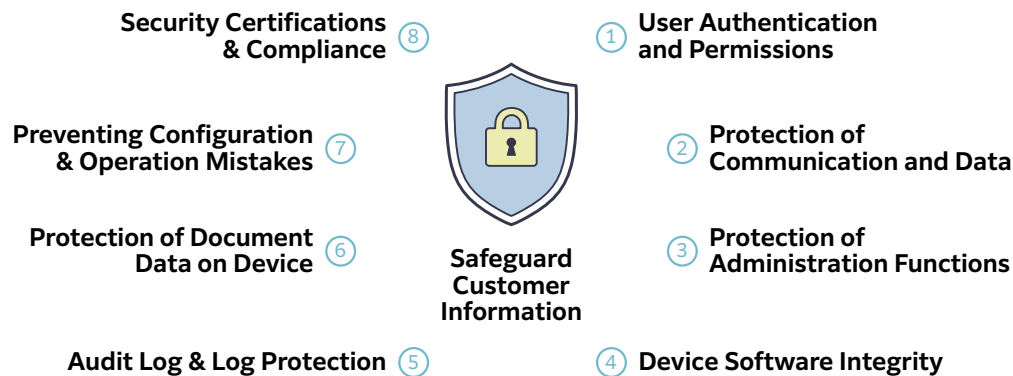

Note: AirPrint, Mopria® Print Service, and Mopria Scan are supported for printing or scanning by using a mobile device.

* Connect to the machine via wireless environment or Wi-Fi Direct® connection. It can be downloaded free of charge from Google Play™ or App Store. Supports copy, fax, print, and scan functions.

Uncompromising Security. Secured for the Cloud

Digital transformation starts with trust. Our multi-layered security framework protects devices, networks, data, documents, and cloud environments, helping organisations safeguard information and grow with confidence.

① User Authentication and Permissions

Ensures only authorised users access the device, preventing unauthorised operations and protecting confidential documents.

- User authentication
- User-specific access control
- Secure printing

② Protection of Communication and Data

Safeguards all data in transit through robust encryption, preventing interception and tampering across all communication channels.

- Encrypted communication via SSL/TLS/IPsec
- Digital Certification Validation
- Encrypted documents and secure Email (S/MIME)

③ Protection of Administration Functions

Restricts administrative access to authorised personnel only, preventing unauthorised configuration changes and privilege misuse.

- Default password security warning
- Customer engineer operation restrictions
- Account lock against unauthorised access

④ Device Software Integrity

Continuously validates and monitors device software integrity, blocking tampering, unauthorised updates and malicious applications at all times.

- Vulnerability detection and software updates
- Integrity verification at startup (Secure Boot)
- Runtime integrity monitoring (White list)

⑤ Audit Log & Log Protection

Comprehensive, tamper-protected audit trails giving organisations full visibility to detect, investigate and demonstrate security compliance.

- Audit & Traceability
- SIEM integration
- UUID printing job log identifier

⑥ Protection of Document Data on Device

Prevents sensitive document data stored on the device from being compromised during disposal, relocation or unauthorised storage removal.

- AES-256 storage encryption
- TPM 2.0 encryption key protection
- Batch deletion of data in device

⑦ Preventing Configuration & Operation Mistakes

Prevents accidental data breaches through built-in safeguards, warnings and controls.

- Security warning message for global IP address
- Fax transmission safeguards
- Watermarks and annotations

⑧ Security Certifications & Compliance

Demonstrating our commitment to delivering trusted and certified device security with independently validated and globally recognised security standards.

- NIST SP800-171/172 Triple-A Rating
- ISO/IEC 20243 Supply Chain Security Certification
- FIPS 140-3 cryptographic module compliance

Driving Resource Efficiency

At FUJIFILM Business Innovation, our longstanding focus has been on providing multifunction printers and solutions with improved environmental performance. We have developed a variety of technologies to reduce CO₂ emissions and promote resource circulation.

Reduced CO₂ Emissions

27.9%^{*1} ↓

Lower CO₂ emissions^{*2} across the entire product lifecycle—from raw material procurement and manufacturing to product use, recycling, and end-of-life disposal.

^{*1}: The ratio for the Apeos C7072 compared to the previous model Apeos C7071 for the Australian market.
^{*2}: The amount of CO₂ emissions from the entire product life cycle including manufacturing, transportation and customer use.

Typical Electricity Consumption (TEC) Value

26.4%^{*1} ↓

With one of the industry's lowest^{*2} TEC values, the device delivers energy savings while maintaining the high performance and usability.

Apeos C7072	Apeos C6572	Apeos C4572	Apeos C3572	Apeos C3072
0.64kWh ^{*3*4}	0.61kWh ^{*3*4}	0.38kWh ^{*3*4}	0.30kWh ^{*3*4}	0.26kWh ^{*3*4}

^{*1}: The ratio for the Apeos C7072 compared to the previous model Apeos C7071 for the Australian market.
^{*2}: A3 colour multifunction printers based on internal study conducted in August 2026.
^{*3}: Based on the measurement method defined by the International ENERGY STAR® Program.
^{*4}: AC230V.

Reduced Fusing Temperature

21°C ↓

The new toner "ELFEAT", combined with a newly developed fusing unit, fuses at one of the industry's lowest^{*} temperatures, contributing to reduced power consumption and environmental impact while delivering exceptional image quality through its fine particle size.

^{*} The toner fusing temperature for A3 colour multifunction printers based on evaluation result in 2024 and internal study conducted in August 2026.

Introducing Recycled Plastic

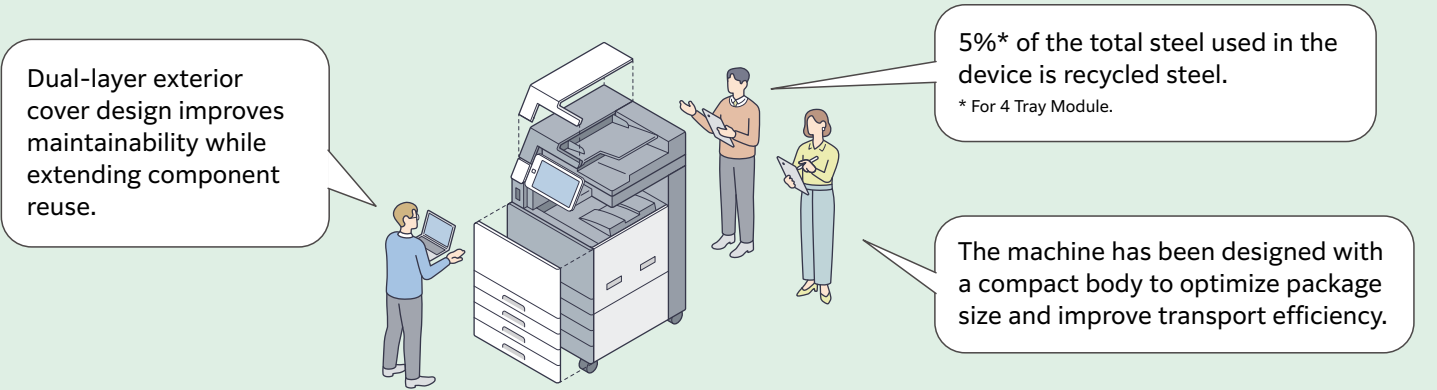

50%^{*}

Recycled plastics are used in key components such as the exterior covers and paper trays. Advanced mould design and engineering help minimise the colour variations typically associated with recycled plastics while improving component strength and rigidity for durability.

^{*} Weight percentage of recycled materials in the plastic parts of the device (configured with 4 Tray Module).

Design for Resource Circulation

Components have been redesigned for easier disassembly, cleaning, and material sorting after collection, helping support efficient resource circulation.

Professional Finishing Solutions

A wide range of finishing options automates time-consuming post-print processes, enabling faster workflows and a polished result every time.

			Finisher-A4	Finisher-B5 + Booklet Maker Unit	Finisher-C5 with Booklet Maker	Finisher-C5 with Booklet Maker + Folder Unit CD3
						
Stapling Capacity ^{*1}	Staple		50 sheets ^{*2}	50 sheets	50 or 65 sheets ^{*3}	50 or 65 sheets ^{*3*4}
	Staple-free Staple ^{*5}		10 sheets	10 sheets	10 sheets	10 sheets
Punch			-	2/4-hole ^{*6}	2/4-hole ^{*7}	2/4-hole ^{*7}
Saddle Staple			-	15 sheets ^{*8}	20 sheets	20 sheets
Single Fold			-	● ^{*8}	●	●
Tri-Fold			-	-	-	● ^{*9}
Z Fold Half Sheet			-	-	-	● ^{*9}
Tray Capacity ^{*10}	Output Tray		-	-	500 sheets	500 sheets
	Finishing Tray		500 sheets	2,000 sheets	1,500 sheets	1,500 sheets

Note: Finisher-A4 is compatible with Apeos C4572/C3572/C3072.

*1: Stapled stapling: up to 90 gsm; staple-free stapling: 64 to 80 gsm.

*2: A4 size. Up to 30 sheets for JIS B4 or larger.

*3: With Finisher-C Staple Unit 65 Sheets.

*4: When mixed with Z fold half sheet, the number of sheets is reduced.

*5: Staple-free stapling does not have binding force equal to stapled stapling. Bound part may be easily separated depending on the paper, temperature, humidity, and how the page is turned over.

*6: 2/4-hole Punch Module for Finisher-B5 is required. Punch Module for Finisher-B5 is required.

*7: Punching function cannot be added. Select a finisher with the hole punching function.

*8: Booklet Maker Unit is required. Saddle Staple and Single Fold on Finisher-B5 make creases without folding.

*9: Folder Unit CD3 is required.

*10: 70 gsm paper, A4 size.
